### Assessment and Triage

 Progressive Engagement

<p><b>Step 1</b></p> <p>For every household who becomes homeless in your system, you provide a basic level of re-housing assistance, which we're calling Rapid Re-Housing 1 (RRH 1). This could include:</p> <ul style="list-style-type: none"> <li>•a list of rental vacancies,</li> <li>•tips about how to find an apartment,</li> <li>•help negotiating with landlords or friends or family members a person could live with, and</li> <li>•some financial assistance for application fees, deposits, etc.</li> </ul> <p>Typically, about a third of shelter stays last a week or less, and this intervention is designed to facilitate that groups exit from homelessness.</p>
<p><b>Step 2</b></p> <p>If it becomes clear that the household will not quickly exit homelessness with only this much assistance (for example if they have no prospects after 5-7 days of searching), then you provide additional assistance, which might include 1-3 months of rental assistance, housing search assistance, and assistance connecting with benefits—Rapid Re-Housing 2. This level of assistance would be focused almost exclusively on re-housing, and it should be sufficient to re-house—at least temporarily—nearly any person who becomes homeless. However, the job may not be over.</p>
<p><b>Step 3</b></p> <p>If at the end of the RRH 2 engagement, or even earlier, it is clear that the person is going to lose their housing without additional help, then more assistance can be provided, such as a 12 month rental subsidy, and more intensive case management, supportive services (e.g. mental health, substance use treatment, and employment assistance) (RRH 3).</p>
<p><b>Step 4</b></p> <p>At some point, it may become clear that the person will never be able to achieve even modest housing stability, in which case you may want to provide a housing voucher (if the issue is primarily economic) or permanent supportive housing (if the person would not be able to maintain housing even with a voucher).</p>

## Progressive Engagement

### **Step 1**

For every household who becomes homeless in your system, you provide a basic level of re-housing assistance. This could include:

- a list of rental vacancies,
- tips about how to find an apartment,
- help negotiating with landlords or friends or family members a person could live with, and
- some financial assistance for application fees, deposits, etc.

## Progressive Engagement

### **Step 2**

If it becomes clear that the household will not quickly exit homelessness with only this much assistance (no prospects after 5-7 days), provide additional assistance, which might include 3 months of rental assistance as part of an HPRP or TANF funded rapid re-housing program

## Progressive Engagement

### Step 3

If it is clear that the person is going to lose their housing without additional help, or if they have lost their housing, then more assistance can be provided, such as a 12 month rental subsidy, and more intensive case management, supportive services (e.g. mental health, substance use treatment, and employment assistance).

## Progressive Engagement

### Step 4

- Housing voucher
- Permanent supportive housing
- Transition in place

### 3. Resource Allocation

#### Should Have

- ☐ A Resource Allocation Strategy
- ☐ Agreement From Providers to Serve Only People Referred to Them
- ☐ Data on Cost per Intervention

### 3. Resource Allocation

#### Options

- ☐ Progressive Engagement and/or Triage
- ☐ Vulnerability Index
